Lab Staff perform over 80,000 analyses annually for parameters including solids, biological and chemical oxygen demand, cyanide, nitrogen compounds, anions, heavy metals, oil and grease, and volatile organic compounds. Instrumentation includes uv/vis spectrophotometer, inductively coupled plasma mass spectrometer, ion chromatograph, as well as various specialized proprietary equipment.

A full list of analysis capabilities and associated prices is on the opposite side of this document. Please contact us for sample bottles and chain of custody forms.

The District's laboratory is accredited through National Environmental Laboratory Accreditation Program.
